# **SAFETY CULTURE: THE FOUNDATION AND TOOLS TO MAKE IT HAPPEN**

**This program is Sponsored by the  
SGA Safety & Health Committee**

### **Panel:**

**Mark Milliken, Panhandle Energy, Safety Director**

**Keith Morris, Southern Union, Sr. Safety Representative**

**Target Audience:** Employees at all levels

### **Program Overview:**

Safety Culture is the enduring value and prioritization of worker and public safety by every member of the organization which is demonstrated by personal action to preserve, enhance and communicate safety; strive to actively learn, adapt and modify behavior based on lessons learned from mistakes. A successful Safety Culture is an open environment for discovering, resolving and sharing safety challenges in a positive manner. This program will focus on safety culture, what it looks like and how we can measure it.

The second half of the program describes a set of simple, effective and inexpensive tools for safety professional to use when auditing pipeline facilities for safety compliance. These tools can also be easily carried and used by operating personnel to insure a safe working environment at a minimal cost to the company.

### **Topics to be discussed:**

#### **Safety Culture: The Foundation**

- What is it?
- What does it look like?
- How do we measure it?
- How do we enhance our company and industry safety culture?
- Case Studies

#### **The Audit Process**

- Select type & location and time of the audit
- Generate verification statements
- Select audit PPE & audit tools
- Pre-Audit
- Opening meeting
- Conducting the audit
- Closing meeting
- Action item tracking and completion
